

FrontEnd Developer - Remote

THE CLIENT

Tech startup in the heart of Berlin. Our mission is to eliminate overproduction in the fashion industry, paving the way for a more sustainable world. We do this by changing the way that clothes are sold and produced, through the use of digitization solutions as well as a machine-learning AI that calculates individual garment measurements of consumers, and facilitating on-demand production.

ROLE

We're at an exciting stage and are looking to expand the team. We are looking for a Frontend Developer (Remote) who will work on all products. This is a highly impactful role, creating key functionalities that will help scale and take its products to the next level. The ideal candidate will ensure that our frontend applications integrate smoothly with our partners and help our admins make the right decisions and steers the garment manufacturing process. They will identify requirements together with Product Management, make the right architecture choices together with the team, and implement a high-quality solution before testing, deploying, and running it.

REQUIREMENTS

- 4+ years of professional frontend development
- Proficient in HTML, CSS, JavaScript and TypeScript
- Experience with React (Angular2+ is a plus)
- Excellent collaboration and communication with both tech and non-tech team members
- Writes clean code following design patterns
- Experience with REST APIs
- EU citizen located in Portugal or Germany or equivalent work permission

NICE TO HAVE

- Writing automated tests (unit + selenium)
- SASS/LESS experience
- DevOps experience, especially on AWS
- Startup experience

We offer a friendly, cooperative and striving work environment in a young, dynamic, goal-oriented team with for a long-term commitment with :

- Competitive full-time payment negotiable based on experience;
- Plenty of opportunity for growth, learn and career develop.
